

PROFILE

Full-Stack Engineer specialized in modern web development, with strong expertise in Angular, React, Node.js and Spring Boot. Experienced in building scalable, secure web applications and integrating REST APIs in fast-paced environments. Motivated, rigorous and ready for rapid on-site integration within dynamic teams.

SKILLS

Technical

- **Programming Languages** - JavaScript (ES6+), TypeScript, Java, Python, SQL
- **Front-End** - Angular, AngularJS, React.js, HTML5, CSS3, Responsive Design
- **Back-End** - Node.js, Express, Spring Boot, Django
- **Web Services** - REST APIs, JSON, SOAP, JWT Authentication
- **Databases** - MySQL, SQL Server, PostgreSQL, MongoDB
- **DevOps** - Docker, Jenkins, CI/CD, Git
- **Testing & Performance** - Unit Testing, Jest, Performance Optimization
- **Soft Skills** - Rigour, Autonomy, Fast Learner, Team Collaboration

Languages

- French: Fluent (C2)
- English: Professional (C1)
- Arabic: Native

EXPERIENCE

- **IPACT Consult** – Full-Stack Developer 2023
Technologies: AngularJS, Spring Boot, SQL Server, MySQL
 - Developed and maintained dynamic AngularJS modules with REST API integration.
 - Processed and visualized JSON data to improve user experience.
 - Optimized front-end performance and ensured cross-browser compatibility.
 - Contributed to backend integration and database design.
- **TANIT Engineering** – Full-Stack Engineer 2025
Technologies: MERN Stack (MongoDB, Express, React, Node.js, TypeScript)
 - Built scalable full-stack web applications with secure REST APIs.
 - Improved performance across front-end and back-end layers.
 - Worked closely with design and product teams to enhance UX.
- **FunnyDev** – Software Engineer 2022
Technologies: MERN, Docker
 - Implemented CI/CD pipelines to automate build and deployment.
 - Ensured scalability, maintainability and robustness of applications.

PROJECTS

- **CoConsult ERP – Consulting Management Platform** Technologies: AngularJS, Spring Boot, MySQL, SQL Server
 - Developed modular front-end components integrated with REST APIs.
 - Designed scalable architecture supporting multi-entity management.
 - Automated deployment using Jenkins and Docker.
- **Réservili – Reservation Management System** Technologies: Angular, Spring Boot, MySQL, JWT
 - Built secure RESTful architecture with authentication and role management.
 - Developed responsive Angular interfaces with dynamic data binding.
 - Implemented JWT-based authentication and authorization.

EDUCATION

Esprit

Engineering Degree in Computer Science

2022–2025

FS Monastir

Master in Instrumentation for Renewable Energies

2022–2024

FS Monastir

Bachelor in Embedded Systems

2019–2021

CERTIFICATIONS

- DevOps – M104 Training
- Git – Le Wagon ([link](#))
- Docker – Le Wagon ([link](#))
- Intro to SQL – Le Wagon ([link](#))
- Intro to UI/UX Design – Le Wagon ([link](#))
- JavaScript Essential 1 – Cisco Networking Academy
