

## PROFILE

---

Java Full-Stack Engineer specialized in Spring Boot and Angular development. Experienced in building secure and scalable web applications, RESTful APIs, and CI/CD pipelines in Agile environments. Strong interest in banking and financial information systems, with solid knowledge of software quality, testing, and containerized deployment. Rigorous, proactive and eager to contribute to large-scale digital transformation projects.

## SKILLS

---

### Technical

- **Programming Languages** - Java, TypeScript, JavaScript (ES6+), SQL
- **Backend** - Spring Boot, REST APIs, Spring Batch (basic knowledge), Maven
- **Frontend** - Angular, AngularJS, HTML5, CSS3
- **Databases** - PostgreSQL, SQL Server, MySQL, MongoDB
- **Testing & Quality** - JUnit, Unit Testing, SonarQube (basic), Debugging
- **DevOps & CI/CD** - Docker, Jenkins, GitLab CI, Git, Linux
- **Architecture** - Microservices basics, UML
- **Methodologies** - Agile Scrum, CI/CD practices, Cycle en V (basic)
- **Soft Skills** - Rigour, Analytical mindset, Adaptability, Teamwork, Proactivity

### Languages

- French: Fluent (C2)
- English: Upper-Intermediate (B2+/C1)
- Arabic: Native

## EXPERIENCE

---

- **IPACT Consult** – Full-Stack Java/Angular Developer 2023  
Technologies: Spring Boot, AngularJS, SQL Server, MySQL
  - Designed and developed RESTful services using Spring Boot.
  - Collaborated with business teams to analyze functional requirements.
  - Implemented scalable backend components and database integrations.
  - Developed frontend features using AngularJS.
  - Wrote unit tests and fixed production issues.
- **TANIT Engineering** – Full-Stack Developer 2025  
Technologies: Node.js, React, MongoDB, Docker
  - Developed REST APIs and microservices.
  - Improved application performance and reliability.
  - Participated in Agile Scrum ceremonies.
  - Contributed to containerized deployment using Docker.
- **FunnyDev** – Software Engineer 2022  
Technologies: MERN, Docker
  - Implemented CI/CD pipelines and automated deployments.
  - Ensured application stability and maintainability.
  - Collaborated with cross-functional teams in Agile environment.

## PROJECTS

---

- **CoConsult ERP** Technologies: Spring Boot, AngularJS, MySQL
  - Designed RESTful backend services using Spring Boot.
  - Modeled system components using UML diagrams.
  - Implemented CI/CD pipeline with Jenkins and Docker.
- **Réservili – Reservation Management System** Technologies: Spring Boot, Angular, MySQL, JWT
  - Developed secure Java backend services with JWT authentication.
  - Implemented role-based access control.
  - Wrote unit tests and optimized SQL queries.
  - Containerized the application using Docker.

## EDUCATION

---

### Esprit

*Engineering Degree in Computer Science*

2022–2025

### FS Monastir

*Master in Instrumentation for Renewable Energies*

2022–2024

### FS Monastir

*Bachelor in Embedded Systems*

2019–2021

## CERTIFICATIONS

---

- DevOps – M104 Training
- Git – Le Wagon ([link](#))
- Docker – Le Wagon ([link](#))
- Intro to SQL – Le Wagon ([link](#))
- JavaScript Essential 1 – Cisco Networking Academy
